SECTION 12 – Guidance Notes

The vehicle inspector will need to check all appropriate documents against the vehicle to ensure that they relate to the vehicle being inspected and to ensure that the requirements of the inspection criteria are met.

The vehicle inspector will record the MOT date of expiry on any relevant databases. The MOT pass certificate must be completed in the prescribed manner as set out in the MOT Testing Guide.

The vehicle inspector will check the VIN plate for evidence of tampering. (Any evidence of tamper must be reported by the tester to the Police traffic division (or DVSA or other appropriate body)).

The vehicle inspector will check the vehicle road fund licence (tax disk) and report any vehicle with no disk or an incorrect or illegal disk to the DVLA. (This may be done on line at http://dvla.gov.uk/onlineservices/report_unlicensed.aspx?ext=dg).

If the vehicle presented has been modified without authorisation, or an exemption from the licensing criteria has not been approved, this will cause the vehicle to fail the inspection. The tester should ask for evidence of written confirmation of alterations such as tow-bars or plate display exemptions etc.

In the event that the vehicle inspector observes a defect that poses a risk to the driver, passengers, other road users or vehicle inspectors/testers, or compromises the roadworthiness or safety of the vehicle, the inspector will immediately report the defect to a senior inspector and a decision on whether to continue with the test at that stage will be taken.

The vehicle inspectors/testers or Depot Manager may contact any other appropriate agencies such as the DVLA, DVSA or South Yorkshire Police if any discrepancies with the vehicle or owner details are identified during a vehicle licensing inspection.
