

Summary Sheet

Name of Committee and Date of Committee Meeting

Cabinet and Commissioners' Decision Making Meeting – 11 December 2017

Title

South Yorkshire Municipal Waste Strategy Adoption.

Is this a Key Decision and has it been included on the Forward Plan?

Yes

Strategic Director Approving Submission of the Report

Damien Wilson, Strategic Director of Regeneration and Environment

Report Author

Lisbeth Baxter, BDR Partnership
01709 255989 or lisbeth.baxter@rotherham.gov.uk

Ward(s) Affected

All

Executive Summary

This report seeks approval for the adoption of the South Yorkshire Municipal Waste Strategy

Barnsley, Doncaster, Rotherham MBCs and SCC are all Unitary Councils in South Yorkshire, this means that each of them has a statutory obligation to collect and dispose of municipal waste arising across South Yorkshire. The Authorities can choose how best to deliver waste services as long as they comply with legislation. Each Authority has their own waste strategy that has shaped their services up to now. All of these strategies would benefit from a review. It is important to review waste strategies regularly to reflect on achievements and progress towards the aims and objectives. It also allows for consideration of changes to; legislation, government targets, local objectives, new technology and increased pressures on the service. Austerity measures and budget cuts will undoubtedly continue to impact on local authority funding. Therefore, collaborative initiatives such as the SYMWS will allow for economies of scale, cost savings and improved efficiency across the four authorities, minimising the impacts on council services.

Recommendations

That the South Yorkshire Municipal Waste Strategy be approved.

List of Appendices Included

Appendix 1 – Consultation Report

Appendix 2 – SYMWS 2017-2021

Background Papers

Barnsley MWMS (adopted April 2007);

Doncaster Waste Strategy and Action Plan (adopted 2009)

Rotherham MWMS (adopted February 2005) and

Sheffield Waste Management Strategy (adopted 2009)

RMBC Equality Analysis Form

SYMWS Technical Document

Consideration by any other Council Committee, Scrutiny or Advisory Panel

The information in this document has been prepared by the South Yorkshire Municipal Waste Strategy working group. The report should be presented for consideration through the individual BDR councils and SCC governance structures.

Council Approval Required

No

Exempt from the Press and Public

No

South Yorkshire Municipal Waste Strategy Adoption

1. Recommendations

1.1 That the South Yorkshire Municipal Waste Strategy be approved.

2. Background.

2.1 Barnsley, Doncaster, Rotherham and Sheffield as Unitary Councils, have responsibility for both the collection and disposal of municipal waste in their area. Their existing waste strategies (listed below) have served as guides to the development of current waste management policies and practices in the districts. These documents now require updating to reflect progress in waste management including; changes in legislation, advances in technology, budget pressures, public awareness and perceptions, increased housing numbers and associated impacts on waste arising. These factors need to be considered and actions taken to manage waste over the longer term.

The existing waste management guidance documents are:

- Barnsley Municipal Waste Management Strategy 2007 to 2030;
- Doncaster Municipal Waste Management Strategy 2009 to 2025;
- Rotherham Municipal Waste Management Strategy 2005 to 2020;
- Sheffield's Waste Management Strategy 2009-2020
- Barnsley, Doncaster and Rotherham Joint Waste Plan 2012 to 2027

Working together towards an overarching strategy will set a framework for efficiencies, sharing of best practice, co-ordinated developments in future services and infrastructure.

2.2 The aim of the SYMWS is to deliver:

- Key stakeholder engagement
- Closer working relationships across South Yorkshire
- Improving efficiency and resources
- Sharing of best practice

2.3 The SYMWS has been developed to build on the existing waste strategies. It provides a long-term direction of travel for the local collection and disposal of waste within the South Yorkshire region. The priorities within the SYMWS have been subject to public scrutiny through a consultation process and reflect the results of that process. (Appendix 1)

2.4 For the South Yorkshire region, the future of waste management will include continuing to build on the relationships already established and the progress made in moving waste up the waste hierarchy, where top priority is given to the prevention of waste followed by re-use, recycling, recovery (including energy recovery) and lastly disposal.

2.5 Through the SYMWS the South Yorkshire Councils are agreeing a joint vision: **“To reduce, re-use, recycle, and recover energy from 95% of South Yorkshire’s waste”**.

2.6 To deliver this vision five priorities have been developed from the corporate plans across the region (see Appendix 1). These priorities were subject to an eight week consultation during the summer of 2016. The priorities are listed below in order of the importance to the residents of South Yorkshire.

Priority 1 - We aim to encourage and inspire children and adults across Barnsley, Doncaster, Rotherham and Sheffield to make less waste by reducing, re-using and recycling more.

Priority 2 – We will work hard to deliver and maintain a dependable and reliable service to all our customers.

Priority 3 –The four Councils will work together more closely to deliver value for money services.

Priority 4 – We will continue to explore how technology can be used to improve recycling and waste services.

Priority 5 – We will be pro-active to influence decision-making on waste at European, national and local level, to drive investment into infrastructure within the South Yorkshire economy.

3. Key Issues

- 3.1 Local authorities are faced with ever-increasing challenges. They have to deal with escalating recycling and re-use targets (the Waste Framework Directive has a target of recycling 50% of household waste by 2020) and additional pressures to reduce landfilled waste tonnages. They also have to satisfy increased customer awareness, expectations and pressures from the public. All against a backdrop of severe public sector spending cuts.
- 3.2 All four Authorities have a statutory duty to collect and dispose of household waste generated within their districts. Historically the authorities have developed their waste collection services in isolation and therefore all deliver their services in slightly different ways. It has been recognised that efficiencies can be made through collaborative working in service specific areas, investing in new technologies, and investigating new smart ways of working together.
- 3.3 Barnsley, Doncaster and Rotherham (BDR) have a history of working together to address waste management issues concerning recycling, cross boundary movements, capacity shortfalls, health and safety, fly tipping and public awareness campaigns.
- 3.4 Historically, Sheffield City have worked more independently on waste matters as their waste disposal solution is a long term integrated contract with Veolia which is due to expire in August 2036.

3.5 The scope of the SYMWS is restricted to Local Authority collected municipal waste including:

- Household waste collected at the kerbside (recycling, composting and residual)
- Local authority collected commercial waste
- HWRC Waste
- Clinical Waste
- Household bulky waste
- Gulley emptyings (not in Sheffield City Council (SCC))
- Street cleansing wastes (not in SCC)
- Fly-tipping (not in SCC)

3.6 The SYMWS is a high-level strategic document with the following deliverables:

- Key stakeholder engagement
- Consideration of engagement outcomes to inform strategy directions
- Closer working relationships across South Yorkshire
- Improving efficiency and resources
- Sharing of best practice

3.7 Some of the areas where the Authorities may work together could include:

- Joint procurement of goods and services
- Seeking funding for waste infrastructure e.g. multi-material recycling facilities or Transfer Stations
- Collaborating on communications campaigns
- Working collaboratively on waste prevention and re-use initiatives

4. Options considered and recommended

4.1 A number of options have been considered as follows:

Option 1 - Do not adopt a SYMWS

As there is no statutory requirement for Unitary Authorities to have a waste management strategy it would be possible not to review the waste management strategy for Rotherham or any of the other Partner Authorities.

As legislation has changed and austerity measures have been implemented driving a need for efficiencies since all four Strategies were produced, failing to review the Waste Management Strategies is not recommended.

Option 2 - Review the Waste Management Strategies individually

The individual Councils could review and update their Waste Management Strategies on an individual basis.

There is a risk that by doing this independently there may be an unforeseen negative impact on the nearest neighbours. This option is, therefore, not recommended.

Option 3 - Adopt a Joint Strategy.

This is the recommended option would allow for the development of efficiencies when preparing the strategy document and may support collaboration through the process.

5. Consultation

- 5.1 Barnsley, Doncaster, Rotherham, and Sheffield Council's Waste Management Officers and Portfolio Holders have been consulted and the Priorities of the SYMWS were subject to an eight-week consultation period, the results of this consultation were built into the strategy and the action plans.

6. Timetable and Accountability for Implementing this Decision

- 6.1 It is proposed that if approved by Cabinet the strategy will be adopted for the period 2017-2021 following the call in period.

7. Finance and Procurement Implications

- 7.1 The financial costs of producing the SYMWS are projected to be £41,000. The costs have been met by splitting the cost equally across all four Councils, therefore, the cost to Rotherham Council was £10,250 and was approved by BDR Steering Group.
- 7.2 The costs will be met from the Community Liaison and Education budget in Barnsley, Doncaster and Rotherham, which is part of the Waste PFI Budget and is managed by the BDR Partnership Manager.
- 7.3 The costs of delivering the outputs of the SYMWS will be managed within the existing Waste Management Budgets of the respective Authorities, with the aim that the Strategy will deliver savings to each Authority.
- 7.4 Any procurement projects identified through the adoption of this strategy must be conducted in line with the Council's Contract Procedure Rules and relevant UK and EU legislation.

8. Legal Implications

- 8.1 There is no statutory duty for Unitary Councils to produce a Waste Management Strategy.

9. Human Resources Implications

- 9.1 There are no human resource implications as a result of these proposals

10. Implications for Children and Young People and Vulnerable Adults

- 10.1 None

11. Equalities and Human Rights Implications

11.1 An Equality Impact Assessment has been undertaken on the SYMWS.

12. Implications for Partners and Other Directorates

12.1 Any savings realised as a result of collaborative working will have a positive impact on budget pressures across the authorities.

12.2 Implementation of the SYMWS should have positive impacts for partners and other directorates, for example, improved service and use of technology could relieve pressure on call centre staff by reducing missed bin collection reports and other associated complaints. Other positive impacts could include increased customer awareness and care when disposing of waste, leading to increased recycling rates across the region.

13. Risks and Mitigation

13.1 The SYMWS will outline a Headline Strategy. To protect the autonomy of the Partnership Councils it will be possible to develop individual action plans for certain aspects. It will be important to ensure that the individual action plans developed are consulted on between the partnership authorities and do not result in conflicts.

13.2 Failing to adhere to the Strategy could result in targets being missed and costs increasing.

14. Accountable Officer(s)

Damien Wilson, Director of Regeneration and Environment
Ajman Ali, Interim Assistant Director, Community Safety and Street Scene
Martin Raper, Community Safety and Street Scene Manager
Lisbeth Baxter, BDR Manager

Approvals obtained on behalf of:-

	Named Officer	Date
Strategic Director of Finance & Customer Services	Judith Badger	22.11.2017
Assistant Director of Legal Services	Dermot Pearson	22.11.2017
Head of Procurement (if appropriate)	Joanne Kirk	27.09.2017
Head of Human Resources (if appropriate)	John Crutchley	27.09.2017
