#### Proposal Description

Capitalise expenditure for works carried out to replace obsolete street lighting units.

#### Details of Proposal (including implications on service delivery)

The proposal is to capitalise expenditure on the replacement of old obsolete street lighting columns with new columns.

Based on the Council’s depreciation policy, the new columns have a lifespan of 40 years and therefore meet the definition of capital expenditure (beyond one year). Therefore it would be appropriate to capitalise this element of the Street Lighting works budget. The annual capital financing costs have been netted off the savings in each year.

#### Implications on other Services (identify which services and possible impact)

None

#### Support required from Corporate Services – Finance, HR, Legal, ICT (please specify)

None

#### Reduction in Staffing Posts (FTEs)

None
