

# Corporate Parenting - Looked After Children Monthly Performance Report

## As at Month End: August 2020

***Please note:** Data reports are not dynamic. Although care is taken to ensure data is as accurate as possible every month, delays in data input can result in changes in figures when reports are re-run retrospectively. To combat this at least two individual months data is rerun for each indicator.*

**Created by:** Performance & Quality Team

# Performance Summary

As at Month End: August 2020

\*DOT - Direction of travel represents the direction of 'performance' since the previous month with reference to the polarity of 'good' performance for that measure. Colours have been added to help distinguish better and worse performance. Key Below:-

- ↑ - improvement in performance / increase in numbers
- - no movement - numbers stable with last month
- ↓ - decline in performance, not on target / decrease in numbers

# LOOKED AFTER CHILDREN

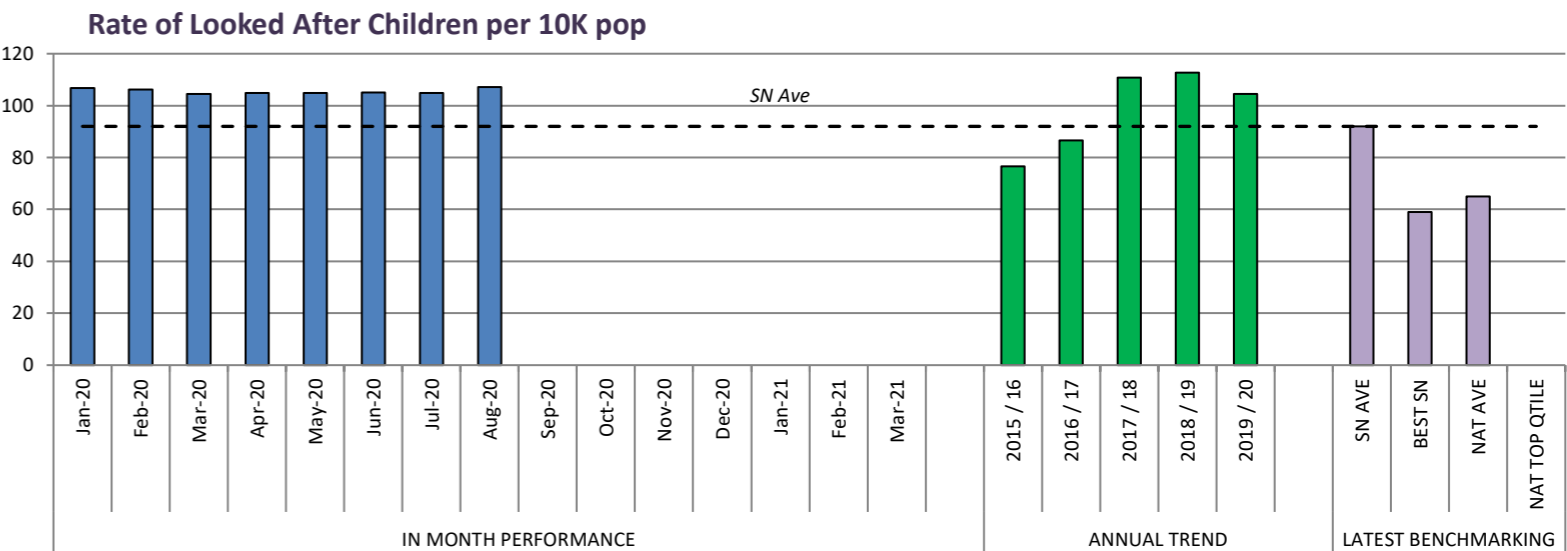

**DEFINITION** Children in care or 'looked after children' are children who have become the responsibility of the local authority. This can happen voluntarily by parents struggling to cope or through an intervention by children's services because a child is at risk of significant harm.

**SIGNIFICANT CHANGES / CONCERNS**

LAC numbers had remained relatively static since April 20 but August 20 has seen a significant increase (+13 to 616).  
 The number of children becoming looked after in August 20 (25) was more than double that of the previous 3 months individually. The 25 becoming looked after was more than double the amount of children ceasing to be looked after in August 20 (12). While the number of admissions into care during Covid have remained relatively stable, in August there has been an increase linked to family breakdown and a peak in young babies becoming looked after.  
 The percentage of children leaving care to permanence was 16.7% in August 20 with 8.3% of these being to an SGO. Additionally, 2 SGO's were started in August, however, this is still relatively low when compared to pre Covid-19 which reflects the impact on court and progressing final hearings and adoption applications being granted. Court dates are being planned now for final hearing and adoption applications so this is expected to increase through the next few months.

**Data Note:** An issue has arisen within the Liquid Logic system which is impacting on the reporting LAC children. For some children who have left care and have had previous care episodes, the same 'end date' is copying into the previous episodes within the system. This has been reported, however, until this is rectified we will be unable to accurately report on measures regarding children ceasing care.

# LOOKED AFTER CHILDREN - REVIEWS, PLANS & VISITS

**DEFINITION** The purpose of a LAC review meeting is to consider the plan for the welfare of the looked after child and achieve Permanence for them within a timescale that meets their needs. The review is chaired by an Independent Reviewing Officer (IRO)  
 The LA is also responsible for appointing a representative to visit the child wherever he or she is living to ensure that his/her welfare continues to be safeguarded and promoted. The minimum national timescales for visits is within one week of placement, then six weekly until the child has been in placement for a year and the 12 weekly thereafter. Rotherham have set a higher standard of within first week then four weekly thereafter until the child has been permanently matched to the placement.

**SIGNIFICANT CHANGES / CONCERNS**  
 98.6% of LAC reviews were held within timescale during August 20 (72/73). There were only 73 LAC reviews held in August 20, which is significantly less than July 20 (137, -64) and the other previous 4 months in 20/21 with an average of 140. This is usual through the summer linked to leave and key partners such as school and health having reduced capacity to contribute to reviews.  
 LAC with an up to date plan decreased to 91.2% in August 20 from 93.7% (July 20), but performance is relatively similar to that during the first quarter of the calendar year 2020.  
 LAC visits in time (NMS) showed a further improvement in August with 94.7% being in time (July 20 - 93.3%). However, this figure does not include any virtual visits carried out since the Covid-19 lockdown began on 23/03/2020. When virtual visits are included this stands at 96.9% (598/617) for August 20.

# LOOKED AFTER CHILDREN - HEALTH

**DEFINITION** Local authorities have a duty to safeguard and to promote the welfare of the children they look after, therefore the local authority should make arrangements to ensure that every child who is looked after has his/her health needs fully assessed and a health plan clearly set out.

**SIGNIFICANT CHANGES / CONCERNS**

Health checks had remained relatively consistent at the start of the 2020 calendar year but since the Covid-19 pandemic beginning in March 2020 health checks have seen a gradual, continued noticeable decline. This has been noted and work is ongoing to support the improvement of timeliness of consent which has been a recent barrier and challenge.

Dental checks are continuing the downward trend that started in October 2019 (88.1%) to 53.5% in August 2020 (-34.6%). The Covid-19 pandemic enforced the closure of dentists, giving a further impact on this measure. Now that the dentists have reopened, this continues to be an area of focus for our looked after children and has been picked up and explored via the health and wellbeing partnership workstream.

The number of initial health assessments completed in August 20 decreased to 7, and of these only 3 were complete in time (42.9%).

# LOOKED AFTER CHILDREN - EDUCATION

## DEFINITION

A personal education plan (PEP) is a school based meeting to plan for the education of a child in care. The government have made PEPs a statutory requirement for children in care to help track and promote their achievements. (PEPs are now in place for LAC aged two to their 18th birthday.)

## SIGNIFICANT CHANGES / CONCERNS

Since the start of Covid-19 in March 20, there have been no further exclusions and as such the figure has remained the same this term. Attendance was recorded through a virtual school reporting mechanism contacting schools and carers. The figure below is based on the figures received on a weekly basis.

The Summer Term PEP completion rates show a slight increase in the LAC with a PEP measure (98.9%) and a significant increase in the number of PEPs in time (96.5%) when compared to the previous Spring term. These figures also show an improvement on last year's performance (2018/19 Academic Year - with a PEP - 97.5% / up to date PEP - 95.0%). This is due in part to the impact of home working supporting increased capacity for the advisers. Of the 19 young people who didn't have a PEP in the summer term 16 either became LAC or ended being LAC during the term and 3 young people did not have a PEP following the request of the CDT team manager. These young people were said to be under a different criteria of care that did mean they did not require a PEP.

Virtual School have been given approval to appoint 2 FTE advisers (filling 1.5 FTE vacancy). Advertisements are out for these posts and interviews will be held in September. It is not clear when any successful applicants will start due to their notice period. Contingency plans are in place to support the normal working of the Virtual School whilst the team is not at full capacity. The focus of the new 0.5 FTE will be to improve transition work and to increase the offer available to 0-2 year olds.

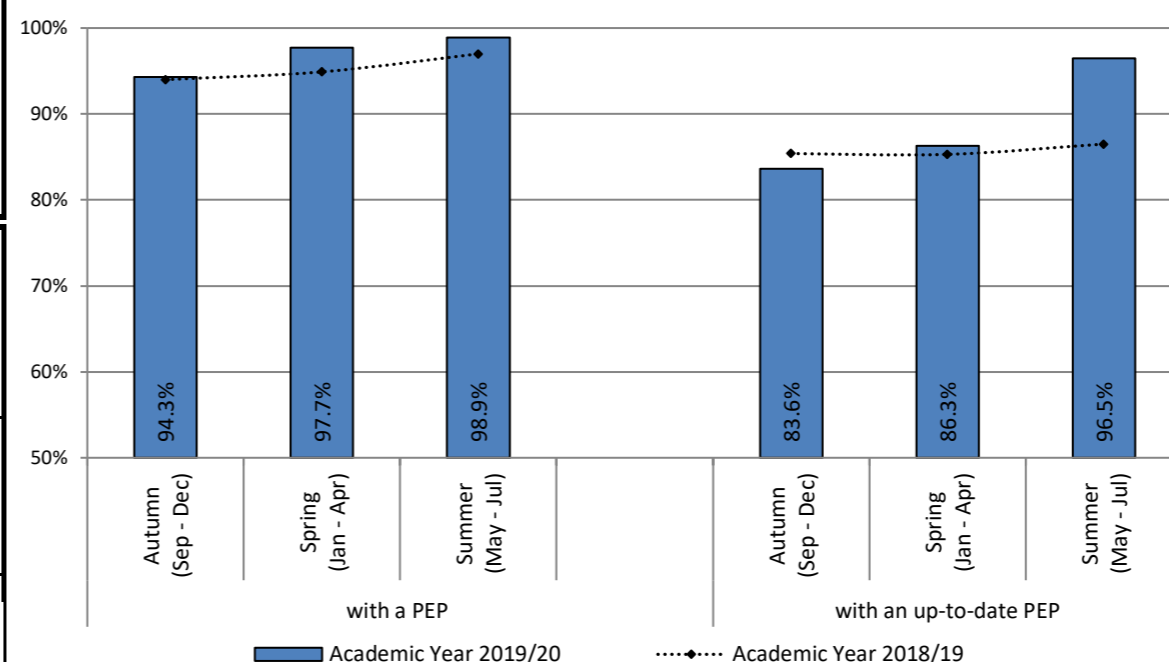

During Covid-19 schools closed with vulnerable pupils and key worker's children being able to attend if required. Monitoring for LAC (including whether children physically attended or were being educated by their foster carer etc) was undertaken by the Virtual School and this was reported on a weekly basis to CYPS DLT and also the strategic GOLD meeting.

Moving forwards, Virtual School attendance will be monitored from within the ePEP system from the start of the next academic year. This will improve the overall quality of the attendance data we hold and will now include all our eligible children from 2-18. All schools and Education providers are aware of the changes and training is being offered. This and changes to the ePEP to improve the overall quality of the PEP and the data we hold has been made live on the ePEP system, thus is ready for the start of the new academic year.

**Data Note:** System produced reports have now been introduced for the below measures which has caused some changes in performance. (PEP data from April 19 onwards is now produced direct from the ePEP system. From June 19 onwards all attendance data is now extracted direct from attendance systems.)

# LOOKED AFTER CHILDREN - PLACEMENTS

DEFINITION	A LAC placement is where a child has become the responsibility of the local authority (LAC) and is placed with foster carers, in residential homes or with parents or other relatives.
------------	--

SIGNIFICANT CHANGES / CONCERNS	<p>The number of children and young people experiencing long term placement stability reduced slightly in August 20 (63%, July 20 65.3%) but is still relatively stable when compared to the 2020 calendar year.</p> <p>There has been a further significant decrease in the percentage of children having 3 or more placements in the last rolling 12 months ( August 20 (7.6%), from 9.3% in July 20). This reflects a small number of children and young people and their carers (47/616) who have had placement disruptions. Note, this is versus 56/603 for July 20, therefore less children and young people overall in August 20.</p> <p>The percentage of children in a family based placement continues to consistently range between 81-82% (81.8% August 20). Similarly, LAC in a commissioned placement ranges between 50-52%. This remains positive given the recent increase in LAC.</p>
--------------------------------	--

Date Note [March 20]: External Fostering numbers are now report direct from Liquid Logic.

# FOSTERING

**DEFINITION** A foster care family provide the best form of care for most Looked after children. Rotherham would like most of its children to be looked after by its own carers so that they remain part of their families and community .

**SIGNIFICANT CHANGES / CONCERNS**

The number of LAC in a fostering placement for August 20 (416 LAC, 67.5% of all LAC) remains fairly consistent compared to the previous 4 months of 20/21.  
 1 new foster carer was recruited during August 20, however there were 3 deregistration's in the same month taking the number of foster carers down to 150. The number of foster care households at the start of 20/21 was 150 (April 20).

# ADOPTIONS

## DEFINITION

Following a child becoming a LAC, it may be deemed suitable for a child to become adopted which is a legal process of becoming a non-biological parent. The date it is agreed that it is in the best interests of the child that they should be placed for adoption is known as their 'SHOBPA'. Following this a family finding process is undertaken to find a suitable match for the child based on the child's needs, they will then be matched with an adopter(s) followed by placement with their adopter(s). This adoption placement is monitored for a minimum of 10 weeks and assessed as stable and secure before the final adoption order is granted by court decision and the adoption order is made .  
Targets for measures A1 and A2 are set centrally by government office.

## SIGNIFICANT CHANGES / CONCERNS

There was 1 adoption in August 20, which bring the year to date total to 3 reflecting the direct impact of Covid-19 on 20/21 performance. Court dates for adoption hearings are now being agreed, which is positive and will support a very different year end picture. The work has been completed of behalf of the LA and involved parties and this is the last part of the process.  
The A1 measure for 2020/21 is reporting at 109.3 days in August and the A2 measure is reporting at 79.7 days. These measures will continue to change as more and more adoptions take place throughout the remainder of the financial year.

Data Note: Performance is taken from the services manual tracker as the data is not currently recorded on LCS.

# CARE LEAVERS

**DEFINITION** A care leaver is defined as a person aged 25 or under, who has been looked after away from home by a local authority for at least 13 weeks since the age of 14; and who was looked after away from home by the local authority at school-leaving age or after that date. Suitable accommodation is defined as any that is not prison or bed and breakfast.

**SIGNIFICANT CHANGES / CONCERNS**

The number of care leavers in August 20 (331) remained the same as July 20.

The majority of care leaver measures have seen a further slight improvement in August 20, with the exception of the care leavers with an up to date plan which reduced in August 20 by 3.6% to 75.5% when compared to the previous month (July 20, 79.1%). This has been flagged as a key area of work to address with managers.

# CASELOADS

## DEFINITION

Caseload figures relate to the number of children the social worker is currently the lead key worker. Fieldwork teams relate to frontline social care services including the four Duty Teams, none Long Term CIN Teams, two LAC teams and the CSE Team. All averages are calculated on a full time equivalency basis, based on the number of hours the worker is contracted to work.

## SIGNIFICANT CHANGES / CONCERNS

The highest caseload within all key safeguarding teams remained at 29 in August 20, and similarly the highest caseload in LAC teams remained at 25.

Most safeguarding teams saw a reduction in the average number of cases within teams (most notably LAC Teams 4 & 5, -3.7 cases), with the exception of the Children's Disability Team whose average caseload increased by 2.1 cases to 20.6. However, two new appointments should see the average caseload fall in the next report (September 20), similar to the 19/20 outturn average (17.5 cases).

The locality service continues to have an average caseload of between 20/21 children (August 20, 20.8 cases) and this has been fairly static since Jan 2020 and remains similar to the 19/20 outturn average (21.7 cases).
