## **7. 2020/21 BUDGET OUTTURN POSITION**

Members considered a report that had been submitted that detailed the 2020/21 Budget Outturn for the Emergency Planning Shared Service.

It was noted that the £85,000 underspend detailed in the report, and that had been reported at previous meetings of the Joint Committee related to 2019/20 and 2020/21. It was noted that it was proposed that the underspend would be rolled over to 2021/22. The Chair noted the unprecedented challenges that the pandemic had presented for the service and the related change of focus of activity that had resulted in the underspend occurring, and that as such he was supportive of the proposed rolling over of the underspend to the 2021/22 budget.

Members agreed that an ongoing surplus over a number of years was not a desirable situation but noted that a large proportion of previous underspends had been largely due to vacant posts that had now been filled. Officers agreed that this was an area of concern and advised that proposals were being developed in order to address the underspend and to ensure a balanced budget in future years.

### **Agreed: -**

- 1) That the report be noted.

## **10. COMMUNITY ENGAGEMENT - UPDATE**

Officers provided a verbal update on Community Engagement activity with regard to the Emergency Planning Shared Service.

In introducing the update officers noted the importance of community resilience as the impact of incidents on communities could be significant. It was noted that the lack of resources for activity in developing and maintaining community resilience was a continuing challenge but was an area that had been highlighted for future activity and development.

With regard to community engagement regarding flooding, officers advised that more activity was needed across both Sheffield and Rotherham in order to maximise community resilience. Officers advised that work was being carried out in partnership with the Environment Agency and a training provider to deliver training in communities that would develop resilience in communities regarding major flooding

incidents. Officers detailed the work that was being carried out regarding this activity.

Members welcomed the planned activity in communities and noted the importance that communications in the community on the issue were varied and not solely digitally based. Members requested that an update be brought to a future meeting of the Joint Committee regarding the roll-out and implementation of this activity.
