	Any additional costs associated with the risks are reported to the BDR Steering Committee for consideration.
3. K	ey Actions and Timelines
3.1	Monitoring
	The PFI project risk register is reviewed by the BDR Steering Committee at their regular meeting every six (6) weeks and reported corporately via the individual Councils' risk registers. Additionally, the BDR Manager reports to the Joint Waste Team and draws attention to issues to allow internal challenge.
	The BDR Manager and the Councils' core contract management team will review and update the risk register on a six (6) week cycle to ensure risks are able to be effectively monitored and managed.
4. R	ecommendations
4.1	BDR Joint Waste Board is asked to consider and note the attached updated risk register and, after consideration, advise of any further risks to be added to or deleted from the risk register.
