

Climate Impact Assessment, Appendix 3 – ILACS Report

Will the decision/proposal impact...	Impact	If an impact or potential impacts are identified:			
		Describe impacts or potential impacts on emissions from the Council and its contractors.	Describe impact or potential impacts on emissions across the Borough as a whole.	Describe any measures to mitigate emission impacts	Outline any monitoring of emission impacts that will be carried out
Emissions from non-domestic buildings?	None	N/A	N/A	N/A	N/A
Emissions from transport?	None	N/A	Meetings of multi-agency strategic groups may involve travel.	The majority of meetings are held online to minimise travel.	N/A
Emissions from waste, or the quantity of waste itself?	None	N/A	N/A	N/A	N/A
Emissions from housing and domestic buildings?	None	N/A	N/A	N/A	N/A
Emissions from construction and/or development?	None	N/A	N/A	N/A	N/A
Carbon capture (e.g. through trees)?	None	N/A	N/A	N/A	N/A

Identify any emissions impacts associated with this decision which have not been covered by the above fields:

Will the proposal affect Council services' resilience to climate change, or the capacity of people living in the Borough to adapt to climate change?

Any impact will be neutral or beneficial. Improving access to universal and community services for children in need of help and protection can reduce health and other inequalities. This can increase resilience to climate change where extreme heat can exacerbate health conditions. Any travel impact through the routine attendance at bimonthly delivery groups is mitigated through the vast majority occurring online.

Provide a summary of all impacts and mitigation/monitoring measures:

The ILACS report outlines work on multi-agency safeguarding responses to children.

It has a negligible direct carbon impact, mitigated through virtual meetings. There are no anticipated carbon impacts associated with two improvements actions noted in the report, regarding the quality of pathway plans and health history information for care leavers.
