Rotherham's Environment and Climate Change Strategy and Action Plan 2011 - 2015

Introduction

National Environmental and Climate Change legislation places significant duties and expectations on local authorities to address climate change issues.

The purpose of this Strategy is to explain how Rotherham MBC will reduce our environmental impact; reduce its contribution to climate change and adapt to future changes resulting from climate change. The strategy will contribute to national climate change objectives including:

- Reducing greenhouse gas emissions by 80% by 2050 against a 1990 baseline.
- Reducing fuel poverty and improve energy efficiency through the Government Energy Company Obligation and Green Deal.
- Generating 15% of the UK's energy consumption from renewable energy by 2020.

Climate change is set to be an issue that will dominate the 21st century because of its economic, social and environmental implications. Although an international issue, many of the effects will be felt, and ultimately will need to be managed, on a local scale.

Progress of the Strategy and Action Plan will be regularly monitored. Achievements and areas of concern against the objectives and targets will be reported annually. The strategy will be reviewed annually or as a result of significant changes from local, regional or national legislation and policies.

The Challenge of Climate Change

There is a wide range of evidence indicating our climate is changing largely as a result of human activities. UK Climate Impacts Programme reported changes are already occurring including:

- Global average temperatures have risen by nearly 0.8 °C since the late 19th century, but the rise has slowed recently.
- On average since 1900 sea-levels have risen by about 10cm around the UK and about 17cm globally.
- Sea-surface temperatures around the UK coast have risen over the past 3 decades by about 0.7 °C.

Seasons are changing in the UK with the growing season starting earlier and finishing later; average rainfall in the summer is decreasing, while in winter it is increasing; species are changing their behaviour, from butterflies appearing earlier in the year to birds starting to change their migration patterns.

Not only is it necessary to take action to mitigate future climate change, there is also a need to adapt to the changes we are likely to face.

Results of modelling carried out for the Yorkshire and Humber Regional Climate Change Adaptation Study also suggest that by 2050:

- Increased and more frequent floods would bring an extended, higher intensity winter flood season and flash flood flows.
- Air pollution, especially during extreme heat events in urban areas, is expected to increase the incidence of health complications.
- Increased pressure on biodiversity and changing eco-systems.

Climate change will present the borough with opportunities as well as challenges:

- Increasing job opportunities in the low carbon sector.
- Providing opportunities for the Advanced Manufacturing and Technology Sector and industries in developing solutions to climate change challenges.
- Potential increase in arable farming yields

Action Plan

The action plan sets out 10 key areas of action where we have the greatest scope to make changes; improve our local environment and reduce carbon emissions. The key areas are:

1. Strategic Planning and Policy
2. Built and Natural Environment
3. Emergency Planning and Recovery, Social Care and Health
4. Energy and Water
5. Engagement, Education And Awareness Raising
6. Housing
7. Procurement and Resources
8. Regeneration and Business
9. Transport
10. Waste and Recycling

Reducing our carbon emissions is essential to translating our commitment into actions. Carbon reductions can often be linked to improving efficiency and reducing cost by reducing waste; reducing energy and water consumption; using low carbon modes of transport; implementing sustainable procurement processes; contributing to carbon reductions through our built and natural environment and influencing behaviour through planning, policies, training and awareness.
