

Footways to be widened to 3 metres, subject to obtaining available land

Cyclists to dismount in order to negotiate narrow footways under railway bridge

Junction improvements to reduce crossing width and improve visibility

Pedestrian crossing points to be improved

Proposed shared-use crossing facilities enabling cycle route to be extended

Existing pedestrian crossing to be converted to a Toucan

Existing junction mouth to be narrowed either through tightening up of the junction radii or installing a central refuge (exact details subject to further investigation).

KEY
 Proposed shared use cycleway / footway
