

APPENDIX B

Ferham Road, Ferham – Proposed traffic calming amendment

Hi, I would like lodge my opposition against the proposed road layout changes on Ferham road. I totally disagree with the plan for a footway build out to narrow the road down to one lane, this will crate severe traffic and unnecessary delay on this main road which is used by lots of people coming in and out of rotherham including myself. I live on this road and I can tell you that this is a high traffic road.

The council is totally ignoring this area and you only need to take a look at the state of the road. This is the first time any work has been proposed, which has not been discussed by residents and it is totally wrong. Can you please do something sensible and spend the money on resurfacing Ferham road and replace the speed cushions.

Thank you
