

ROTHERHAM BOROUGH COUNCIL – REPORT HEALTH AND WELLBEING BOARD

1.	Meeting	January 2015
2.	Date	21/01/2015
3.	Title	Health and Wellbeing Performance Report
4.	Directorate	Public Health

Note - Data in the report represents last update requested as at the end of November 2014.

Major Performance Issues (Red rated indicators)

Priority 1 Smoking

Overall Comment

A new tobacco control programme has been commissioned to begin in April 2014 comprising a new Doncaster and Rotherham Smokefree Service, smoking in pregnancy support further embedded within midwifery, enhanced enforcement of illicit tobacco and age of sale legislation, youth prevention activity and social marketing for tobacco control across Rotherham, Doncaster and Sheffield. Performance of the new services will be monitored against service specifications and nationally collected data.

Goal 1 Preventing Initiative of Tobacco use amongst children and young people

Percentage of smoking at time of delivery

Baseline data may be affected by high percentage where mother's smoking status not known (quarters Q1 and Q2 2011/12)

Targets adjusted to match national ambition decrease of 21.7% between 2009/10 and 2014/15 (to be achieved between Q3 2010/11 and 2014/15) (31/05/13)(AI)

Quarterly position shows high variation, so suggest notice is predominantly taken of outturn figure.

Smoking at delivery rates rose slightly during 2013/14, when we would have anticipated a continued fall. There are number of factors which could have influenced this including: transition of service from the stop smoking service to midwifery, specialist midwife sickness during Q4 affecting capacity, inaccurate recording of smoking at delivery status and uncertainty of midwifery staff about how to record smoking status of women who switch to electronic cigarettes during pregnancy.

New systems have been put in place since the team has moved to midwifery, including electronic booking of stop smoking appointments by community midwives, clinic lists and text appointment reminders. An audit of smoking at booking and smoking at delivery recording is planned as this is has been shown to be inaccurate in other areas in Yorkshire and Humber, with appropriate follow-up dependent upon results.

Priority 2 Alcohol

Goal 2 - Reducing Harm to Adults from alcohol consumption

Alcohol related admissions

Data represents number of admissions to Rotherham Foundation Trust by Rotherham CCG patients.

The team to deliver this piece of work has now been selected, work was scheduled to begin in October/November (2013) but this was delayed until quarter 4. Due to the late start to the work the 2013-14 target was adjusted to maintain 2012-13 level with the 20% reduction set as the 2014-15 target.

Although the metrics for the project are not demonstrating reductions in admissions overall, reductions for the cohort of 3+ admitters are now in evidence, and length of stay is significantly reduced. The CCG will be reviewing this scheme in October (2014).

The programme is making good progress to reduce length of stay, but, as overall admissions have increased, this figure increases also. There is evidence that the programme is reducing admissions for the specified cohort.

Priority 3 Obesity

Goal 1 Preventing obesity in children and young people

National Child Measurement Programme data

Percentage of overweight and obese children in Reception/Year 6

Data on overweight and obese children in Reception/Year 6 data is published annually. Outturn for 2012-13 and 2013-14 was higher than for 2011-12, especially for Reception year. Once detailed data is available for 2012-13 this will be analysed to highlight the reasons behind the increase.

Healthy Eating Prevalence

No further data after 2011-12 baseline. Indicator replaced by 'Excess weight in Adults' in Local Authority Health Profiles.

Advised by Public Health England that an indicator is planned to be included in the Public Health Outcomes Framework (PHOF) similar to 'healthy eating prevalence'. Data for this is to be collected via the Active People Survey from late 2014 and hoped to be published in PHOF February or May 2015.

Priority 4 NEET

RMBC Corporate Responsibility LAC/CL Young People (Academic Year 12 -14) who are Not in Employment, Education or Training

This cohort comprises 28 individual young people, of whom 14 (50%) are aged 18 and 19. This age group are able to claim benefit in their own right, and live independently, therefore are an extremely hard group to engage in any form of learning.

A further 9 (33%) are of Y13 academic year. Of those 9 young people, 6 are resident outside of Rotherham.

The remaining 5 (17%) have all recently left compulsory education and have a range of complex needs. Two young people in this group are resident outside the Rotherham area but are still being supported by the service, one is in Temporary Accommodation at Rush House with intensive support from the service, one has health issues which prevent engagement in Learning at this time one has never engaged despite persistent attempts, whilst the remaining 1 is currently engaging with the service and moving towards a learning outcome.

IYSS is currently revisiting its approach to working with the LAC/CL group, with a view to a more Locality based model and strengthened working relationship with the Care Leaver team.

Priority 5 Fuel Poverty

Goal 1 – Reducing the effects of Fuel Poverty

The number of properties receiving energy saving measures through CESP

Funding available to Utility Providers, ear-marked for 2012-13, was rolled over into 2013-14. The anticipated target of 1,285 will not be met as CESP has come to an end. The reason for not meeting the target was because Utility Providers had made the required carbon savings on other earlier national schemes.
