Dear Councillor Tinsley

Council Meeting – 25th May 2022

Further to the question that you raised at Council on 25th May regarding including the requirement of the developers to install a Community Accessible Defibrillator, I have spoken to the planning team and they have agreed to raise this issue within any pre application discussions for major housing proposals.

The provision of such equipment does not require planning permission and cannot therefore form part of any planning approval or requirement under a planning condition or legal agreement. However, the developers will be advised that it is good practice to liaise with the CCG to determine if one is desirable and encouraged to provide one if recommended to do so by the CCG.

If you would like to discuss further, please contact Nigel Hancock, Head of Planning at nigel.hancock@rotherham.gov.uk.

Yours sincerely,

Councillor Denise Lelliott

Cabinet Member for Jobs and the Local Economy
